The banner features the European Union flag logo on the left. The text reads: "EudraVigilance - European database of suspected adverse drug reaction reports". Below this, a paragraph states: "The European Medicines Agency publishes these data so that its stakeholders, including the general public, can access information that European regulatory authorities use to review the safety of a medicine or active substance. **Transparency** is a key guiding principle of the Agency."

The European Union database of suspected drug reaction reports is [EudraVigilance](#), and they are now reporting 23,252 fatalities, and 2,189,537 injuries, following COVID-19 injections.

A *Health Impact News* subscriber from Europe reminded us that this database maintained at EudraVigilance is only for countries in Europe who are part of the European Union (EU), which comprises 27 countries.

The total number of countries in Europe is much higher, almost twice as many, numbering around 50. (There are some differences of opinion as to which countries are technically part of Europe.)

So as high as these numbers are, they do NOT reflect all of Europe. The actual number in Europe who are reported dead or injured following COVID-19 shots would be much higher than what we are reporting here.

The EudraVigilance database reports that through August 28, 2021 there are **23,252 deaths and 2,189,537 injuries** reported following injections of four experimental COVID-19 shots:

From the total of injuries recorded, almost half of them (1,076,917) are **serious** injuries.

*"**Seriousness** provides information on the suspected undesirable effect; it can be classified as 'serious' if it corresponds to a medical occurrence that results in **death**, is life-threatening, requires inpatient hospitalisation, results in another medically important condition, or prolongation of existing hospitalisation, results in persistent or significant disability or incapacity, or is a congenital anomaly/birth defect."*

A *Health Impact News* subscriber in Europe ran the reports for each of the four COVID-19 shots we are including here. It is a lot of work to tabulate each reaction with injuries and fatalities, since there is no place on the [EudraVigilance](#) system we have found that tabulates all the results.

Since we have started publishing this, others from Europe have also calculated the numbers and confirmed the totals.*

Here is the summary data through August 28, 2021.
