According to the most recent stats released by the CDC this past Saturday, August 14, 2021, their Vaccine Adverse Event Reporting System (VAERS) now has recorded more than twice as many deaths following the non-FDA approved experimental COVID-19 shots during the past 8 and a half months, than deaths recorded following ALL FDA approved vaccines for **the past 30 years**.

This has to be the most censored information in the U.S. right now, even

though these statistics come directly from the CDC.

They have now recorded 12,791 deaths, 16,044 permanent disabilities, 70,667 emergency room visits, 51,242 hospitalizations, 13,139 life threatening events, among 682,873 reported injuries from 571,831 cases.

From the 8/6/2021 release of VAERS data:

PDF by:
<https://www.pro-memoria.info>

Found 571,831 cases where Vaccine is COVID19

Table

 Event Outcome	 Count	 Percent
Death	12,791	2.24%
Permanent Disability	16,044	2.81%
Office Visit	95,886	16.77%
Emergency Room	57	0.01%
Emergency Doctor/Room	70,610	12.35%
Hospitalized	51,087	8.93%
Hospitalized, Prolonged	155	0.03%
Recovered	191,823	33.55%
Birth Defect	351	0.06%
Life Threatening	13,139	2.3%
Not Serious	230,930	40.38%
TOTAL	† 682,873	† 119.42%
† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 571831 (the number of cases found), and the Total Percentage is greater than 100.		

The CDC's official response to these statistics is that they are basically coincidences, and are not related to the experimental COVID-19 shots.

Reports of adverse events to VAERS following vaccination, including deaths, do not necessarily mean that a vaccine caused a health problem. A review of available clinical information, including death certificates, autopsy, and medical records, has not established a

causal link to COVID-19 vaccines. (.)

Trusting in the CDC for COVID-19 safety information is quite obviously **deadly**. Because it is widely known that these statistics that they admit to are but a fraction of actual cases, as very few medical professionals are willing to classify an injury or death as caused by COVID-19 injections.

By way of contrast, deaths following all FDA-approved vaccines for the 30 years prior to the emergency use authorizations of the COVID-19 shots total 6,068 over 30 years according to the CDC.

From the 7/23/2021 release of VAERS data:

PDF by:
<https://www.pro-memoria.info>

Found 6,068 cases where Patient Died and Vaccination Date from '1991-01-01' to '2020-11-30'

Table

	 
Age	Count Percent
< 3 Years	3,447 56.81%
3-6 Years	95 1.57%
6-9 Years	45 0.74%
9-12 Years	54 0.89%
12-17 Years	129 2.13%
17-44 Years	319 5.26%
44-65 Years	373 6.15%
65-75 Years	364 6%
75+ Years	683 11.26%
Unknown	559 9.21%
TOTAL	6,068 100%

What are NOT included in these 12,791 deaths the CDC is reporting following COVID-19 shots, are the number of fetal deaths following COVID-19 injections into pregnant women, which now numbers 1,360 deaths according to the CDC.

From the 8/6/2021 release of VAERS data:

Found 1,360 cases where Vaccine is COVID19 and Symptom is Aborted pregnancy or Abortion or Abortion complete or Abortion early or Abortion incomplete or Abortion induced or Abortion late or Abortion missed or Abortion of ectopic pregnancy or Abortion spontaneous or Abortion spontaneous complete or Abortion spontaneous incomplete or Foetal cardiac arrest or Foetal death or Premature baby death or Premature delivery or Stillbirth

Table

	 	
Age	Count	Percent
17-44 Years	953	70.07%
44-65 Years	15	1.1%
Unknown	392	28.82%
TOTAL	1,360	100%
