

17,503 DEAD, 1.7 Million Injured (50% SERIOUS) Reported in European Union's Database of Adverse Drug Reactions for COVID-19 Shots

Total Views : 2,565

The banner features the European Union flag logo on the left. The text reads: "EudraVigilance - European database of suspected adverse drug reaction reports". Below this, a paragraph states: "The European Medicines Agency publishes these data so that its stakeholders, including the general public, can access information that European regulatory authorities use to review the safety of a medicine or active substance. **Transparency** is a key guiding principle of the Agency."

COVID-19 Vaccine Adverse Drug Reactions
17,503 DEAD
1,687,527 Injuries Through July 03, 2021

COVID-19 MRNA VACCINE MODERNA (CX-024414)
COVID-19 MRNA VACCINE PFIZER-BIONTECH
COVID-19 VACCINE ASTRAZENECA (CHADOX1 NCOV-19)
COVID-19 VACCINE JANSSEN (AD26.COV2.S)

At the bottom, there are two logos: the European Medicines Agency logo (a blue circle with a white 'E') and the EudraVigilance logo (a yellow circle with a blue 'E').

The European Union database of suspected drug reaction reports is [EudraVigilance](#), which also tracks reports of injuries and deaths following the experimental COVID-19 "vaccines."

A *Health Impact News* subscriber from Europe reminded us that this database maintained at EudraVigilance is only for countries in Europe who are part of the European Union (EU), which comprises 27 countries.

The total number of countries in Europe is much higher, almost twice as many, numbering around 50. (There are some differences of opinion as to which countries are technically part of Europe.)

So as high as these numbers are, they do NOT reflect all of Europe.
The actual number in Europe who are reported dead or injured due to COVID-19 shots would be much higher than what we are reporting here.

The EudraVigilance database reports that through July 3, 2021 there are **17,503 deaths** and **1,687,527 injuries** reported following injections of four experimental COVID-19 shots:

From the total of injuries recorded, half of them (837,588) are **serious** injuries.

*“**Seriousness** provides information on the suspected undesirable effect; it can be classified as ‘serious’ if it corresponds to a medical occurrence that results in **death**, is life-threatening, requires inpatient hospitalisation, results in another medically important condition, or prolongation of existing hospitalisation, results in persistent or significant disability or incapacity, or is a congenital anomaly/birth defect.”*

A *Health Impact News* subscriber in Europe ran the reports for each of the four COVID-19 shots we are including here. This subscriber has volunteered to do this, and it is a lot of work to tabulate each reaction with injuries and fatalities, since there is no place on the [EudraVigilance](#) system we have found that tabulates all the results.

Since we have started publishing this, others from Europe have also calculated the numbers and confirmed the totals.*

Here is the summary data through July 3, 2021.

*These totals are estimates based on reports submitted to [EudraVigilance](#). Totals may be much higher based on percentage of adverse reactions that are reported. Some of these reports may also be reported to the individual country’s adverse reaction databases, such as the U.S. VAERS database and the UK Yellow Card system. The fatalities are grouped by symptoms, and some fatalities may have resulted from multiple symptoms.
