EudraVigilance - European database of suspected adverse drug reaction reports

The European Medicines Agency publishes these data so that its stakeholders, including the general public, can access information that European regulatory authorities use to review the safety of a medicine or active substance. **Transparency** is a key guiding principle of the Agency.

As many countries around the world now begin another round of

lockdowns, and take steps to cut off citizens from social life if they do not consent to receive one of the deadly COVID-19 shots and carry around some kind of identification that marks them as "vaccinated," (See:) the death tolls following these injections continue to rapidly increase.

Yesterday we reported about an alleged whistleblower with the U.S. CDC who is claiming that there have been at least 45,000 deaths reported within 3 days of receiving the injections, and that this information is being suppressed. See:

And yet, most people around the world still seem to be completely ignorant regarding how many deaths following COVID-19 injections are actually being recorded by government health agencies, as the corporate media around the world for the most part is not allowed to cover these verifiable statistics showing unprecedented amounts of deaths and crippling injuries following these shots, all of which are still in the experimental phase and have not even completed Phase 3 trials yet.

What we are witnessing is quite clearly a worldwide genocide and the implementation of a plan to reduce the world's population.

Never before in modern, or even ancient history, have governments around the world acted in unison to force a medical procedure upon all their populations, and silence all dissenters who try to sound the warning alarm, which include tens of thousands of doctors and scientists.

The European Union database of suspected drug reaction reports is and they are now reporting 18,928 fatalities, and 1,823,219 injuries, following COVID-19 injections.

A *Health Impact News* subscriber from Europe reminded us that this database maintained at EudraVigilance is only for countries in Europe who are part of the European Union (EU), which comprises 27 countries.

The total number of countries in Europe is much higher, almost twice as many, numbering around 50. (There are some differences of opinion as to which countries are technically part of Europe.)

So as high as these numbers are, they do NOT reflect all of Europe. The actual number in Europe who are reported dead or injured due to COVID-19 shots would be much higher than what we are reporting here.

The EudraVigilance database reports that through July 17, 2021 there are **18,928 deaths and 1,823,219 injuries** reported following injections of four experimental COVID-19 shots:

From the total of injuries recorded, half of them (904,609) are **serious** injuries.

*"**Seriousness** provides information on the suspected undesirable effect; it can be classified as 'serious' if it corresponds to a medical occurrence that results in **death**, is life-threatening, requires inpatient hospitalisation, results in another medically important condition, or prolongation of existing hospitalisation, results in persistent or significant disability or incapacity, or is a congenital anomaly/birth defect."*

A *Health Impact News* subscriber in Europe ran the reports for each of the four COVID-19 shots we are including here. This subscriber has volunteered to do this, and it is a lot of work to tabulate each reaction with injuries and fatalities, since there is no place on the system we have found that tabulates all the results.

Since we have started publishing this, others from Europe have also calculated the numbers and confirmed the totals.*

Here is the summary data through July 17, 2021.

Some of these reports may also be reported to the individual country's adverse reaction databases, such as the U.S. VAERS database and the UK Yellow Card system. The fatalities are grouped by symptoms, and some fatalities may have resulted from multiple symptoms.
