The CDC released more data into VAERS (*Vaccine Adverse Event Reporting System*) this past Friday which included cases through October 1, 2021.

The U.S. Government is now reporting that in the past 10 months since the emergency use authorization for the COVID-19 shots 16,310 people have died following those shots. ([Source](#) <sup>[1]</sup>.)

By way of contrast, prior to December, 2020, the date when the first COVID-19 shots were given emergency use authorization, 6,214 people reportedly died following ALL FDA-approved vaccines for the past 30 years. (Source [2].)

So in the past 10 months, over 2.5X more people have died following COVID-19 shots than people dying after all vaccines for the past 30 years, according to official government statistics.

# COVID-19 Shots Past 10 Months

↓	↑ ↓	
Event Outcome	Count	Percent
Death	16,310	2.09%
Permanent Disability	23,712	3.05%
Office Visit	121,304	15.58%
Emergency Room	57	0.01%
Emergency Doctor/Room	87,758	11.27%
Hospitalized	75,392	9.68%
Hospitalized, Prolonged	213	0.03%
Recovered	242,522	31.15%
Birth Defect	528	0.07%
Life Threatening	17,618	2.26%
Not Serious	336,659	43.23%
<b>TOTAL</b>	† 922,073	† 118.41%

† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 778685 (the number of cases found), and the Total Percentage is greater than 100.

# All Vaccines for Past 30 Years

↓	↑ ↓	
Event Outcome	Count	Percent
Death	6,214	0.9%
Permanent Disability	16,254	2.35%
Office Visit	37,344	5.41%
Emergency Room	180,714	26.16%
Emergency Doctor/Room	13,309	1.93%
Hospitalized	63,704	9.22%
Hospitalized, Prolonged	2,938	0.43%
Recovered	323,225	46.79%
Birth Defect	99	0.01%
Life Threatening	12,109	1.75%
Not Serious	220,389	31.9%
<b>TOTAL</b>	<b>† 876,299</b>	<b>† 126.86%</b>

† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 690779 (the number of cases found), and the Total Percentage is greater than 100.

## Source: U.S. Government VAERS

In addition to recording over 2.5X more people dying after a COVID-19 shot, in the past 10 months following COVID-19 shots there have been more permanent disabilities, more life threatening reactions, and more hospitalizations than the past 30 years following all vaccines.

And yet the CDC and the FDA continue to lie to the American people and people around the world by claiming COVID-19 shots are "Safe and Effective."

Centers for Disease Control and Prevention  
CDC 24/7: Saving Lives, Protecting People™

## What You Need to Know

- COVID-19 vaccines are **safe and effective**.
- Millions of people in the United States have received COVID-19 vaccines under the most intense safety monitoring in U.S. history.
- CDC recommends everyone 12 years and older get vaccinated as soon as possible to help protect against COVID-19 and the related, potentially severe complications that can occur.
- CDC, the U.S. Food and Drug Administration (FDA), and other federal agencies are monitoring the safety of COVID-19 vaccines.

In addition to these recorded deaths following COVID-19 shots, the VAERS database has now recorded 2,102 fetal deaths following the injection of COVID-19 shots into pregnant women for the past 10 months. (Source [4].)

By way of contrast, VAERS lists 2,184 fetal deaths following **all vaccines** for the past 30 years. (Source [5].) So about as many babies have been lost to pregnant women for the past 10 months following COVID-19 shots as have been lost to pregnant women for the past 30 years following all vaccines.

And yet the CDC and FDA are telling all pregnant women to get a COVID-19 shot. (Source [6].)
