Alden et al, Lund University, Sweden, confirms one of our worst fears. The exogenous genetic material coding for the dangerous Spike protein is reverse-transcribed into the human genome; possible long-term constitutive expression/synthesis of disease promoting/lethal Spike. <https://t.co/JEzSwSruWM>

@davidkurten

After 2 years of propaganda to say this isn't true, it has now been found that mRNA from experimental injections is written in to human DNA, changing it to generate toxic spike proteins.

I will not be taking an experimental injection.

WAŻNA PUBLIKACJA!

🇸🇪 naukowcy potwierdzają jedną z naszych najgorszych obaw. Egzogenny materiał genetyczny kodujący niebezpieczne białko kolca ulega odwrotnej transkrypcji do ludzkiego genomu; możliwa długotrwała konstytutywna ekspresja/synteza chorobotwórczego białka kolca.
