

# StatCan report reveals 135% increase in deaths due to "unspecified causes"

Statistics Canada has revealed that COVID deaths broke records in 2022, and that there has been a massive spike in deaths due to "unspecified causes."

*StatCan report reveals 135% increase in deaths due to "unspecified causes"*

A [report](#) released by Statistics Canada last week admitted that deaths due to COVID-19 in Canada rose by 36% last year, resulting in 19,716 deaths total – despite the widespread uptake of mRNA vaccines allegedly designed to suppress the virus.

Moreover, from 2020 to 2022, deaths due to "Other ill-defined and unspecified causes of mortality" rose by a shocking 135%.

Statistics Canada blamed the increase in COVID deaths on the relaxing of

the tyrannical mandates, masking, and lockdowns, as well as the “new highly transmissible COVID-19 variants.”

**Table 1**  
**Top 10 leading causes of death (2019 to 2022)**

	2019	2020	2021	2022	2019	2020	2021	2022
	number of deaths				rank			
<b>Total, all causes of death</b>	<b>285,301</b>	<b>308,412</b>	<b>311,640</b>	<b>334,081</b>	...	...	...	...
Malignant neoplasms	80,372	81,242	82,822	82,412	1	1	1	1
Diseases of heart	53,364	54,430	55,271	57,357	2	2	2	2

Additionally, the report reveals that Canadian life expectancy decreased for the third year in a row, a trend that coincidentally started in 2020.

## People’s Party of Canada leader Maxime Bernier blows the whistle

People’s Party of Canada (PPC) leader Maxime Bernier took to X to blow the whistle on this development.

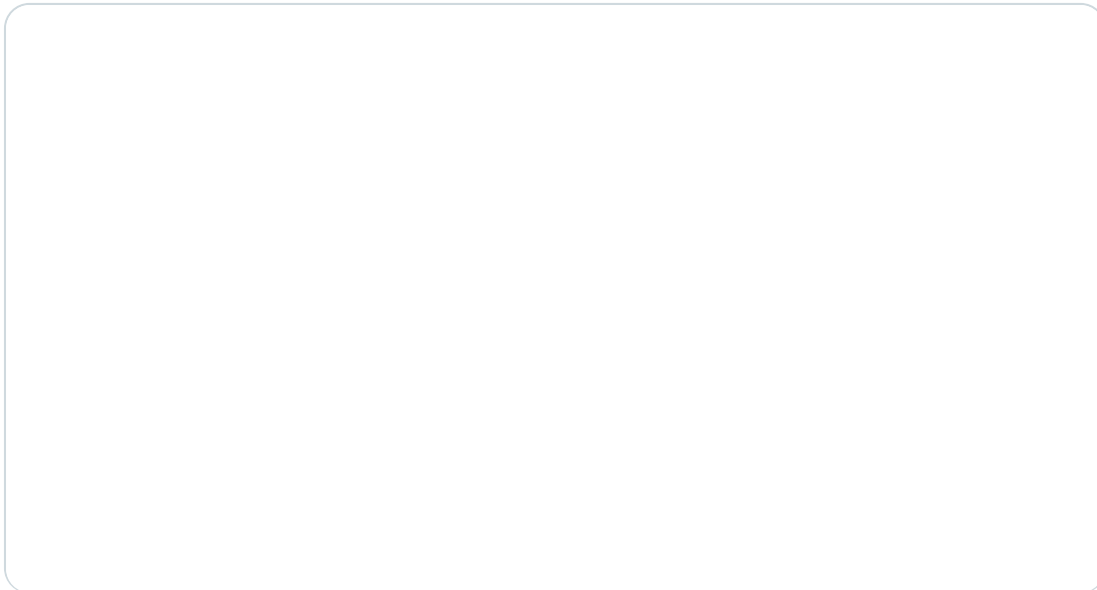

Maxime Bernier

Here are more shocking data on the number and causes of deaths in Canada released earlier this week by StatsCan.

Not only were there more official covid deaths in 2022 than in 2021 and 2020 despite the fact that 85% of Canadians had by then received a supposedly "safe and... [Show more](#)

[Read 200 replies](#)

In the December 5 edition of the PPC newsletter, Bernier delved into the implications of the report, saying, "These deaths have almost **TRIPLED** since 2020 from 6,841 to 16,043 in 2022."

He further added, "What happened in 2021 that could have caused this explosion of unexplained deaths over the last 2 years?"

"An experimental pharmaceutical product was rushed to market and forced on Canadian society, is what happened. They told us it was 'safe and effective' but over the last few years we have learned more and more

about how that covid shot was neither," said Bernier.

The party leader then accused the establishment of ignoring such a significant development, saying this breaking news was "ignored by all of our crooked establishment politicians and the dishonest corporate media."

## **75% increase in excess deaths in 2022**

The Justice Centre for Constitutional Freedoms released a study on excess death data in August, with [bombshell](#) findings.

"Excess deaths in 2022 increased to an estimated 37,000 compared to an estimated 21,000 in 2021—an approximate 75 percent increase," the report stated.

"Fewer than half of these deaths (n=16,300) were attributed to COVID-19."

According to a COVID research group, there have been approximately [90,500 excess deaths](#) in Canada since the beginning of the "pandemic." Their data compilation shows that out of the total number of excess deaths in 2022, 38% of those were attributed to be from unknown causes.

In 2021, death due to "unknown causes" was the [leading cause of death in Alberta](#).

*Screenshot of COVID-19 Resources Canada's graph titled 'Percent total annual excess mortality attributed to specific causes of death.' (November 18, 2023)*

Of course, government data can be skewed and misrepresented, as the case of [Barry Young](#) demonstrates.

In November, 56-year old New Zealand government IT employee Barry Young leaked damning information about the toxicity of COVID-19 vaccines, revealing a possible death toll as high as 10 million deaths worldwide.

On Sunday, Young was arrested for leaking the health data.
